valentunpron@gmail.com

SKILLS:

CYBERSECURITY:

- Windows/Linux
- OSI and TCP/IP
- Nmap, Metasploit, WhatWeb, Curl
- Python and Bash

BACK-END:

- Node.js
- Express
- MongoDB
- JSON Web Tokens

FRONT-END:

- HTML5/CSS/JavaScript, TypeScript
- React (Hooks, Router)
- Next.js
- Redux / Redux-toolkit
- Tailwind

EDUCATION:

Professional College of Electronic Devices Ivano-Frankivsk

2019-2023

Junior Specialist, Automation and computer-integrated technologies

Ivano-Frankivsk national technical university of oil and gas

2023-2025

Bachelor, Automation and computer-integrated technologies (systems Engineering - Internet of Things)

LANGUAGE:

- Ukrainian (native)
- English B1
- Czech A2

PROFILE:

My name is Valentyn. I am a Cybersecurity Specialist with a year of commercial experience as an IT & Security Engineer at "Prykarpatenergotreyd". I specialize in Infrastructure Defense and Network Security, with a deep understanding of the OSI model and TCP/IP stack.

What sets me apart is the combination of Enterprise Administration (Active Directory, GPO, Linux hardening) and Full-stack development (React, Node.js). This allows me to see security as a holistic system — from hardware diagnostics and network routing to code-level vulnerabilities and JWT security. I am an active CTF participant (HackTheBox, GUR) and proficient in English (B1), which I use daily for technical documentation and research.

EXPERIENCE:

WEB DEVELOPER 2022- 2024

- Developed a responsive web platform using React and Next.js, integrated with a Node.js/Express backend.
- Engineered high-performance SPAs utilizing React Hooks and React Router for fluid, dynamic client-side navigation.
- Completed end-to-end data persistence by connecting interactive frontend interfaces with a MongoDB database for full Create, Read, Update, and Delete functionality.

PRYKARPATENERGOTREYD 2024- 2025

Information Technology and Information Security Engineer

- Infrastructure scanning, detection of open ports and vulnerable services.
- Diagnostics and servicing of servers, PCs, and peripherals.
- Configuration and basic routing for routers and switches.
- Installation, configuration, and hardening of enterprise software.
- Network status monitoring and proactive troubleshooting.
